“Through the Looking Glass: Protecting Yourself While Conducting Internet-Based Investigations”

Abstract:

“Through the looking glass” is a metaphorical expression meaning: on the strange side, in the twilight zone, or in a strange parallel world. While the internet can be considered a strange, parallel world, it can also be an informative, interesting, yet scary place when conducting different types of investigations. There are various technologies and methods that investigators can use to protect their identity and their own information while conducting various internet-based investigations. This presentation will showcase and illustrate these technologies and methods in order to keep investigators safe.

Learning Objectives:

- Identify some of the methods criminals use to find your data
- Compare various technologies and software tools to protect your identity while investigating online
- Examine various methods to employ to hide your own tracks

Ryan Duquette CFE, CFCE, EnCD, MCFE, LPI – Partner, RSM Canada

Ryan Duquette is a Partner at RSM Canada and focuses on litigation support, cyber incident response, privacy and technology risks, digital forensics and cyber fraud matters. Ryan has been an investigator for over twenty years and was previously a police officer focusing on cybercrime and fraud cases. Ryan works closely with clients involved in workplace investigations and civil litigation matters including intellectual property theft, HR investigation and data breaches.

He was a sessional lecturer at the University of Toronto teaching digital forensics, is a director for the Toronto chapter of the Association of Certified Fraud Examiners, has been qualified as an expert witness on numerous occasions, and is a frequent presenter at fraud, digital forensics, cybersecurity and investigative conferences worldwide.
