**“Artificial Intelligence Uses in the
Accounting, Investigation and Legal Fields”**

By 2030, 70% of companies will be using some type of Artificial Intelligence. In the accounting and legal areas, Artificial Intelligence is used to analyze and extract information from contracts and leases, revise legal contracts, invoices, and financial statements, and detect patterns in data analysis to aid in fraud investigation. Participants will take a look at how Artificial Intelligence is impacting these areas in addition to reviewing ethical issues as well as get an idea of the educational needs for future investigators.... *more at acfi.ca*
